CHURCH LIFE

25TH ANNIVERSARY CELEBRATION THIS SABBATH

This Sabbath we will celebrate Sunnyside's twenty-fifth anniversary. Come join us as we thank God - remembering the blessings from our past and looking forward with hope in the richness of our future in Him. The day will include an extra special worship service with words from some of our former pastors and their memories of our spiritual journey. Immediately following worship service we'll have a "salad potluck" followed by fellowship time with an anniversary cake and ice cream.

Thank you to all who currently use their talents to keep the Spirit of Sunnyside alive and well, and thank you to our founders for having the faith to move forward when God called. May He continue to bless us as we serve Him.

Our Charter Membership totaled 81 in 1987. Today our family has grown to 548 and counting.

A very warm welcome to everyone on this very special Sabbath. May your spirits be lifted as we worship together in prayer, Bible study, and in Song. As we officially become a church company it is our desire to continue to ever reflect our Lord's compassion, love and concern for all by being a caring and loving church family. If you are looking for such a church, we would invite you to join us.

HEALTHY BYTES

ARE YOU FALLING FOR THESE FOOD LABEL LIES?

by SHAPE Magazine

How *food-label* savvy are you? Although food labels are regulated by the Food and Drug Administration (FDA), cutting through the fat (ha!) to understand the fine print can be difficult for even the sharpest of grocery shoppers. Over the next few weeks we’ll take a look at 10 sneaky ways food manufacturers cash in on your healthy intentions:

1. If the label says "0 Grams of trans fat..."

A mad-scientist project gone wrong, trans fats are created in a lab by partially hydrogenating healthier oils. This process destroys the many good benefits of the original fats. What's worse, consuming trans fats ups your risk for heart disease and metabolic syndrome. Most nutritionists recommend avoiding them altogether, which doesn't sound so hard except current labeling guidelines allow manufacturers to round anything less than 0.5g/serving down to zero. Eat more than a few servings, and you've consumed a significant amount of the "Frankenfood."

Avoid it: Anything that says "partially hydrogenated oil," "hydrogenated vegetable oil," or "shortening" on the ingredients list contains trans fats, no matter what the label says.
